

Wirraway Motorhomes Unique Storage Drawer System

Wirraway Motorhomes only build one product - Motorhomes!

We don't build caravans and campers so all of our resources are concentrated on building the best motorhomes on the market. We are avid motorhomers ourselves which ideally positions us to continually develop new ways to further improve our motorhomes through on-road testing in all conditions throughout Australia. We have travelled extensively throughout Europe and the USA to find new materials and electronic and mechanical technologies from the RV, Aviation and Boating industries that we can adapt, apply and design in new ways to improve our Wirraway Motorhomes so as to remain a leader in the Australian market.

At Wirraway we take great pride in everything we manufacture, our storage units are no exception!

We have included photos and descriptions in these pages and elsewhere to show you many of our drawers unique features.

Design

Wirraway's unique storage drawer system is ergonomically designed to make everything easy for you! We have designed our range with older people in mind by providing easily accessible, secure, convenient storage in locker drawers and hatches on both sides for your BBQ, gas bottles, camping gear. In most cases we have a large drawer at the rear of the motorhome under the bed, with easy access from inside & out.

Construction

We use heavy gauge aluminum and heavy duty slides to construct our storage systems to create strong weather proof enclosures to protect your gear in the harshest of conditions.

With the Wirraway storage drawer system - access is not only easy - it's ergonomic as well - no need to kneel or to peer into a darkened hatch as each drawer is at waist level drawer has a lockable hinged lid that is powdercoated and makes for a handy side table, as well as keeping everything secure, clean and dust free making setting up effortless!

When it's time to move on - packing up couldn't be any easier, simply close your drawers and your off!
